Applicants note that we received an office action in a corresponding Taiwanese patent application. The Office Action cited Taiwanese published patent application no. TW 534001 having an equivalent US 2003/0031498 and TW 535734 having no U.S. equivalent. Applicants have enclosed a copy of the English abstract of TW 534001 for the Examiner's easy reference. Applicants also enclose copies of EP 1285780 A2 and EP 1285780 A3 as they are in the family of patents with TW 534001.

As for TW 535734, we were not able to obtain an official abstract for this case. However, please see the following description: TW 535734 discloses a mechanical pencil actuated by a rear button (B) and a ratchet mechanism. The head of the chuck 542 is clamped by the front portion 512 of a sleeve 51 upon the biasing force of a spring (52). The rear end 541 of the chuck is fixedly mounted in the moving member 53. No cushioning effect is provided.

Please call the attorney responsible for this case at the phone number provided below if you have any questions regarding this IDS or other matters related to this application.

Respectfully submitted,
